

Designer Introduction

I've been building with construction bricks for most of my life, and I've always been fascinated with making them move. Getting models to move in interesting, complex or unique ways is a challenge that keeps me motivated and pushes my creativity. Not to mention, it usually results in a model that is really cool to look at. I'm also inspired by many old mechanical devices, as it truly amazes me what people have achieved with simple collections of gears and linkages. I hope you enjoy building my creations as much as I enjoyed designing them!

Designer: JK Brickworks

A handwritten signature in white ink on a dark background. The signature consists of the letters 'JK' on the top line and 'Brickworks' on the bottom line, written in a cursive, slanted style.
